

# Kirtland's Warbler Habitat Matching Activity

Cut out these pictures and have your students match up the bird with its habitat.

The Kirtland's Warbler is a bird. They're super picky about where they live! They make their nests in two types of pine trees, but only when the trees are young. When the trees get too old, they can't live there any more.

Duck

Goose

Heron

Gull

Parrot

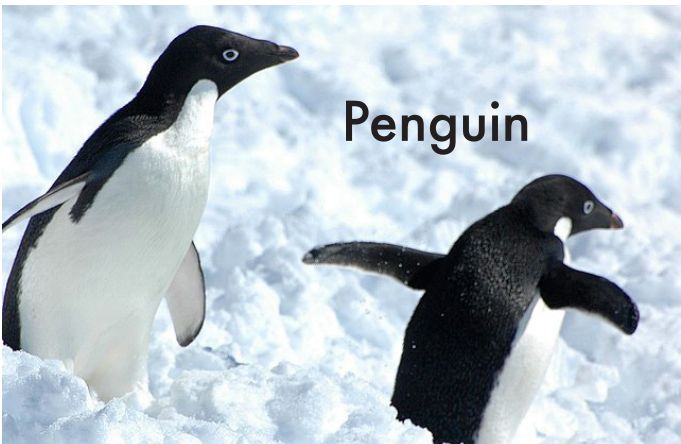

Toucan

Sandpiper

Owl

Penguin

Woodpecker

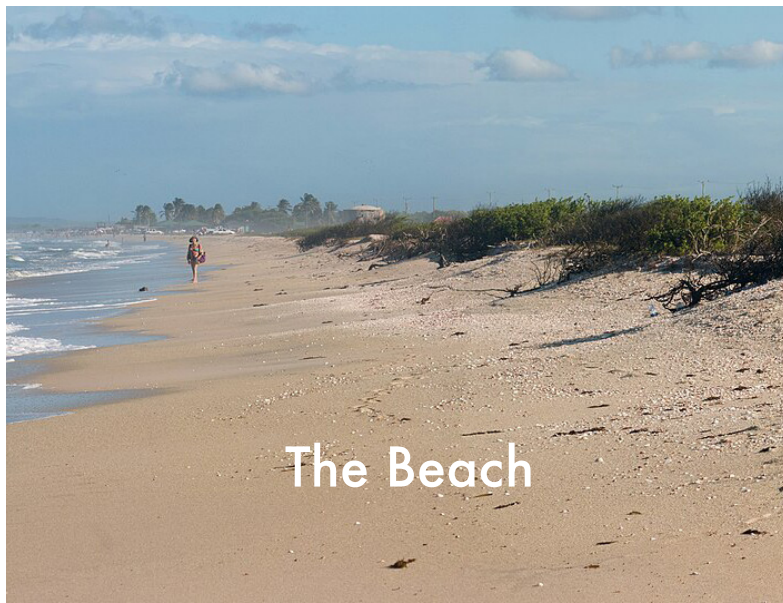

Chickadee

Wild Turkey

The Beach

Pond

Tropical Rainforest

Antarctica

Ontario Forest
